OVATION

DATA SHEET

Ovation

Turn PowerPoint slides into breathtaking presentations

Ovation turns lifeless Microsoft® PowerPoint slides into a stunning visual experience in seconds. Select from over 100 sensational PowerLooks™ to add subtle motion, high-resolution text,, and dynamic TV-style transitions to plain PowerPoint slides. Ovation also includes a suite of invaluable presentation tools that help you deliver your message better.

Presentations Have Never Looked So Good

- **Create & Edit in PowerPoint** as usual. Then drag and drop your PowerPoint file onto Ovation's desktop icon. Ovation will instantly turn PowerPoint slides into a visually-stunning presentation.
- **PowerLooks™** are more than themes or a plug-in for PowerPoint. They add vibrant color, subtle motion, and high-resolution text to plain, lifeless slides.
- **Highly-Readable Text** transforms low-resolution fonts into a message that can range from tastefully subtle to sparkling brilliance.
- **Smooth Motion** captures audience attention and keeps it throughout the presentation.
- **Bullet Emphasis** keeps audiences focused. As each new bullet is revealed, the previous bullet steps back from the spotlight and becomes transparent or defocused.
- **Message Reinforcement** enables users to add thought-provoking words or concepts as semi-transparent text that move subtly in the show's background giving presentations a distinctive look.
- **Walk-In & Walk-Out Slides** give an excellent first impression to a large audience by greeting them as they enter and thanking them as they leave a room.
- **Title Slides** exhibit presenter contact information and showcase the presentation name in a unique way.
- **Brand Reinforcement** lets users add their organization's logo, brand elements and even an entire background image to turn Ovation's PowerLooks into their own brand-building look.
- **Go to PowerPoint** button allows users to open PowerPoint from within Ovation so they can quickly make edits to their presentation without closing either program.
- **PowerLooks Favorites** gives users quick access to the looks that they use most.
- **PowerLooks Organizer** provides a variety of ways to filter through more than 100 PowerLooks allowing users to choose by color or by style.

Powerful Presentation Tools Keeps Users Confident and Effective

- **PointPrompter™** turns notes into a scrolling teleprompter just like newscasters use to help users stay confident and on point while citing facts, figures, dates and other data—all without memorizing or cluttering up slides.
- **TimeKeeper™** keeps users on pace by letting them know at a glance if they're ahead or behind on the presentation so they can determine whether to speed up or skip over certain points.
- **Go Deeper** attaches hidden, expanded information to PowerPoint slides that can be used in response to audience questions.
- **Next Bullet** helps you make a smooth transition from point to point by peeking at your next bullet without having to reveal it to the audience first.
- **Intermission Mode** displays a countdown or time of day clock to ensure everyone's back from break on time.
- **Slide Timer** preserves slide times imported from PowerPoint as well enables users to customize their own timing per slide. This is especially useful when users have a tight time schedule.
- **Slide Navigation Bar** displays a thumbnail image of each slide along with its allotted slide time.
- **Direct Slide Access** allows users to quickly access any slide in the Slide Navigation Bar by simply clicking on it. This eliminates the need to constantly hit the back button when referencing a previous slide.
- **Disable Slide** preserves the Hide Slide feature within PowerPoint and can be enabled at any time. Users can disable any slide at any time within Ovation without deleting the actual slide.
